Issue Date : 08/21/2015

This is to confirm the verification of the Quality Assurance Program of the listed Manufacturer meets the requirements of Canadian Standard CSA B51.

Client : Pathway Control Products, Inc.
22262 Cuttler Rd. New Caney, Texas USA

Description of equipment : Pneumatic and Electric Level Control Switches

System Verified to : CSA B51

Hazard Level : NON-LETHAL, NON-CYCLIC SERVICE

Audit performed : May 21, 2015

Certificate expiration : May 21, 2025

Verification Process:

Written Quality Control system was Audited using the TSSA "QC Manual Review Checklist for the Manufacture of Fittings as Required by CSA B51."

Result /Comments:

The various fittings have been designed in accordance with, where applicable, ASME B16.34, B16.42, B31.3, B31.8 and Section VIII, Division 1. They meet the design and operating conditions as specified in the current drawings. Materials and design listed in the applicable drawings shall be adhered to by the manufacturer. The Manufacturer shall comply with the requirements of the ASME Standard(s), as applicable for the specific fitting for the entire manufacturing process of the item, including all preparation of material, machining, test records, material traceability, and requirements set forth in your QAP Revision 5, 5/18/15 and CSA B51.
